Quality

www.rakporcelain.eu

This top quality porcelain made by RAK is guaranteed shock resistant, oven, microwave and dishwasher safe and keeps its enamel and decoration on a longstanding basis.

The RAK products are designed to a specification meeting with the European standards, ISO 9001: 2000 certified and approved by the Véritas and SFC tests for France and the CERAM laboratory for England, making them in full compliance with the requirements of the professionals of the catering and hotel industry.

Specifications

01. Impact resistance of non-metallic articles for catering and industrial use in compliance with the BS EN 12980:2000 and ASTM C 368-88 standards
02. Resistance of handles of ceramic articles as per the requirements of the BSI PAS 54 standard, December 2003
03. Resistance to microwave heating as per the requirements of the BSI PAS 54 standard, December 2003
04. Resistance to the use from freezing to microwave oven as per the requirements of the BSI PAS 54 standard, December 2003
05. Thermal shock resistance and endurance as per the requirements of the BS EN 1183:1997 and BSI PAS 54 standards, December 2003
06. Resistance of decoration to alkaline detergents as per the requirements of the BSI PAS 54 standard, December 2003
07. Cracking resistance as per the requirements of the BS EN 13258 standard, 2003
08. Resistance to scratches by sharp metal objects as per the requirements of the BSI PAS 54 standard, December 2003
09. Water absorption coefficient in compliance with the requirements of the BS 5416 standard, 1990
10. Degree of translucency of articles determined as per the EN 1184 standard.
11. Test methods for pouring and fit of lids of holloware as per the requirements of the BSI PAS 54 standard, December 2003
12. Resistance of handles and knobs to high temperatures as per the requirements of the BSI PAS 54 standard, December 2003
13. Toxicity threshold of the metal contained in the decoration in compliance with the BS 6748 standard and the UKAS accreditation

Oven +300°C

The RAK oven safe porcelain gradually increases in temperature to ensure gentle cooking of food meaning your dishes will keep their flavour longer.

Microwave

RAK porcelain ensures cooking or quick reheating without altering the taste or flavour of your dishes.

Holding of temperature

Once put on the table the dishes keep their heat ensuring the content remains at the right temperature giving you the time to enjoy it.

Dishwasher

The RAK porcelain's smooth enamel is quick and easy to clean. Thanks to the quality, your tableware will stay as new for a long time.

100% Hygiene

RAK cooking porcelain is a 100% natural, guaranteed lead-free product. It is non-porous and does not absorb grease, odours or bacteria ensuring you optimum hygiene.

Mechanical shock

The exceptional hardness of the RAK porcelain ensures it is highly chip and shock resistant. It is therefore very easy to stack.

Thermal shock

From the freezer to the microwave, RAK porcelain withstands differences in temperature thanks to the exceptional hardness of its material making it highly thermal shock resistant.
